Full-Stack Developer | BCA Student

CAREER OBJECTIVE

Passionate BCA student and full-stack developer with hands-on experience building responsive web applications using HTML, CSS, PHP, and Flask, and applying Python for data analysis and machine learning. Looking for an opportunity to apply strong analytical and problem-solving skills to real-world software and business challenges.

ACADEMIC PROJECTS

Mental Health Risk Prediction System | *Python, Pandas, Scikit-learn, Matplotlib, Flask, HTML/CSS*
[Live Demo](#) · [GitHub](#)

- Built an ML-based web application to estimate mental health risk as Low, Moderate, or High based on user inputs.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) on mental health datasets.
- Trained and integrated a machine learning model with a Flask web application to generate real-time predictions

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — KMS NGO

6 Weeks | Online Internship

- Understood project requirements and prepared **SRS and development roadmap**.
- Led a team in developing a **full-stack management website** using **Laravel, PHP, MySQL, and Tailwind CSS**.
- Managed development from **planning to implementation**, coordinating frontend and backend work.
- Performed **API testing and debugging using Thunder Client**.
- Gained practical experience in **team leadership, testing, and end-to-end web development**.
- **GitHub:** <https://github.com/RohanMishra3620/karunamrit-management-system>

Web Development Intern — YNG Media

6 Weeks | Offline Internship

- Built and deployed features for **three live client websites — Tapaco, Hinoida, and VEDDING** — during a 6-week offline internship.
- Worked with PHP frameworks and gained practical understanding of the MVC architecture.
- Handled **website implementation and project-level development tasks** alongside the in-house team.

Internship Projects — Tapaco, Hinoida, VEDDING

- Built and contributed to live client websites during the YNG Media internship.
